

REQUEST FOR PROPOSAL (RFP) #99402

Project: Enterprise Data Orchestration Vendor Selection

Issued By: Global Finance Corp

Instructions to Vendor: > Please provide detailed technical responses to the following requirements. Vague answers will result in disqualification.

Section 1: Architecture & Scalability 1.1 Describe your underlying platform architecture. How do you ensure high availability, and which cloud providers do you utilize to host your infrastructure? 1.2 What is your current processing scale, and what types of industries currently utilize your platform?

Section 2: Security & Compliance 2.1 Detail your encryption standards for data both at rest and in transit. 2.2 Explain your cryptographic key management lifecycle (e.g., how often are keys rotated?). 2.3 List all current, valid third-party security and privacy certifications your organization maintains.

Section 3: Disaster Recovery & Business Continuity 3.1 What are your guaranteed Recovery Time Objective (RTO) and Recovery Point Objective (RPO) metrics? 3.2 Detail your data backup frequency and the specific type of storage used for these backups.

Section 4: Service Level Agreements (SLA) & Support 4.1 Outline your SLA for platform uptime. Are there specific windows reserved for scheduled maintenance? 4.2 If your platform experiences an outage that drops uptime below your SLA guarantee, what is the exact financial penalty/credit structure provided to the client? 4.3 What is your Initial Response Time (IRT) for critical, Severity 1 support tickets?

Section 5: Commercials 5.1 Assuming we purchase the standard Enterprise Tier, what are the exact overage costs if we exceed our allotted user seats and API call limits?
